1. Welcome, practical matters
2. Introductions: all participants introduce themselves and their organization, and tell us about their wishes for this project.
3. The workplan: Liesbeth will explain the objectives of the project, the output that we have to produce, everyone's tasks, the workshops, etc.
4. Management and finances: Sarah Cullen (UCLan) will explain about the Erasmus+ rules and regulations, about what is, and is not allowed, contracts, payments, timesheets, invoices, etc.

**Thursday 14:00 – 17:00 pm: Requirements for our output**

---

5. Presentations of existing entrepreneurship curricula and training programmes. This will be more like a brainstorm or workshop. We will look at R&R's entrepreneurship curriculum, and at some of the activities / training programmes for young entrepreneurs that UCLan organizes for its students. These are all training programmes for hearing persons. I hope that Outi and Ole can tell us something about the Entrepreneurship training by Frontrunners, and by Castberggaard Highschool. Miriam: maybe you can tell us something about your activities / plans for Deaf artists?

We discuss the differences and similarities: Can we use 'mainstream' products, and

'just' translate these into sign language? Or are Deaf sign language users different? If they are different: how and why? And: what does this mean for our output? What do deaf sign language users want, what do they need? Can we agree on requirements for our output?
